IOWA UTILITIES BOARD**

Dear Adam:

MEC has informed General Electric Company that it intends to develop and construct up to a 650MW of wind turbine projects. Based on our experience in providing wind turbine generators we are confident that we can supply wind turbines to meet your needs.

GE is one of the world's leading wind turbine manufacturers. With design and manufacturing facilities located in the U.S., Europe and Asia, we offer variable speed wind turbine technology ranging from 1.5 MW to 4.1 MW. We also provide a full array of professional wind power capabilities including project design and layout, project management as well as operation and maintenance services. Globally GE has over 32GW of installed wind turbines, over 21,000 units in 22 countries. When operated and maintained in accordance with GE O&M manuals, scheduled & unplanned maintenance intervals and relevant technical specifications our GE wind turbines may have an operating life of 30yrs.

This letter is for discussion purposes only, and is not an offer of any commitment or additional warranty on our part, nor is it intended to be legally binding or to give rise to any legal or fiduciary relationship between General Electric Company or its affiliates and any other person.

Best Regards,

Christy Harrington – Account Manager
