IOWA UTILITIES BOARD

To: Iowa Utilities Board

As a landowner who lives adjacent to the Turtle Creek Wind Farm LLC proposed transmission lines and sub-station, I am NOT in favor of it.

This proposed transmission line will decrease the value of my building sight, which I plan to sell within the next few years. Also, health concerns for those in close proximity of said lines is in jeopardy.

It also seems to me that if a person is to benefit financially from the sub-station, then they should also burden the negative effects.

I believe there are other options for the route of this line that would have less negative human and livestock impact.

Please reconsider.
