**IOWA UTILITIES BOARD**

Dear Iowa Utilities Board Representative,

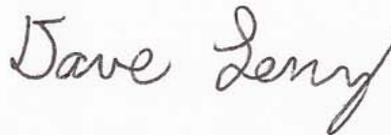

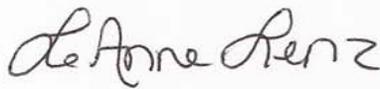

RE: Docket Number: E-22276

This letter and enclosed maps are in regard to our objection to the proposed 345kv transmission line in the Turtle Creek Wind Farm Project in Mitchell County - Specifically the portion between Lancer Avenue and the proposed substation in section 34 of Union township.

The route marked in black is EDP Renewables proposed route, which would run less than 300 feet from four existing houses and less than 200 feet from our house. [Properties marked in yellow]

The route marked in green is an alternate route that we suggest. This route provides much greater distance from our homes and any other neighboring homes.

Thank you for your attention to this matter.

Dave and LeAnne Lenz  
4701 Kirkwood Ave.  
St. Ansgar IA 50472
