C. Buchanan County and the state of Iowa need to be protected from this electric pollution. Even more UNACCEPTABLE are the abuse of Iowa resources and health for LONG distance distribution, to the extreme of transmitting ACROSS the state to ANOTHER state. These very concepts should be granted NO consideration. The use of eminent domain for such action would be unconscionable. There should be no leniency, and especially none in the proposal of such abuse by a PRIVATE merchant, much less a private merchant from ANOTHER state. The proposed transmission line will not serve public use nor represent the public interest as its consumers would be outside the state of Iowa. The granting of the power of eminent domain for this project is unjustified given the distance and the degree of damage to Iowa land owners for the shipment of electricity outside the state of Iowa. Wind-generated electricity can and should be generated within reasonable distance the target consumer of this proposal. Perhaps less concern, but notable nonetheless, is the issue of visual pollution, the uglification of the landscape across this state. But the health of the people and livestock of Iowa, and the rights of Iowa citizens as land and property owners are of utmost concern. Every detail of this proposal is an affront to Iowa and Iowans.
