If other, please provide company name: Rock Island Clean Line

Have you contacted the utility about the problem? No

Do you currently have working utility service? No

==General nature of your complaint:==

(check all that apply): Other

If other, please describe: Objecting to Rock Island Clean Line
Project

==Description of Complaint:==

Describe your problem in detail: (Please be sure to include any dates, times, names of persons, or other details that will be helpful to our understanding the problem and seeking resolution.): This project must be stopped! My farm is well tiled 50 ft from fence or is patterned tiled every 80 ft and very shallow at 2.5-3 ft deep. I have seen construction crews like these that don't give a damn about anything but their project, and they are offering us peanuts! I have one pipeline through one of my farms for over 35 years and the GPS mapping is still showing a yield loss. They came to fix it, and put it too deep, so then they built a wall with grader blades and planks. Needless to say they did a bad job of cleaning up and left blades

which damaged my field cultivator, broke shanks and drag teeth. \$1000 bill and nobody wants to pay it. I have another farm with a fiber cable plowed in, they broke 5 different tiles when they plowed it in. Finally got it fixed after 5 years. Now there are 2 washouts where they went through the creek with plow. Just started getting wide enough now. About 5 ft wide and they say it is my responsibility. I think Eminent Domain is bullshit and nobody cares about my property but me. Right now I am watching dozers pull cement trucks across fields for some electric line close to home. Do you think anything will grow in ruts that are 3-4 ft deep in the next five years? Where is the respect for the farmer? What about GPS and auto shut-off signals that will be affected? Docket #E22123-E22138
